The possibilities are endless!

- Emblems can be partially stitched or 100% embroidered.
- All emblem designs are easily subdued.

Photo Emblems

Custom Photo Sublimation Emblems

Schweizer's Photo Emblems are emblems made using a sublimation transfer process where photographs or artwork are reproduced photographically with unequaled detail and vibrant color clarity. This is an inexpensive solution that is sure to draw attention wherever it is used and is a great alternative to screen-printing. Artwork must be submitted in digital format (on disk, CD or via email).

Micro-lite

Custom Reflective Emblems

Micro-Lite is Schweizer Emblem's line of reflective emblems that enable high visibility day or night! Visibility related injuries can be greatly reduced with Micro-Lite emblems by Schweizer. Be seen (and safe) in adverse weather conditions such as low light, rain, snow and darkness by wearing our highly reflective emblems. Millions of tiny reflective lenses are embedded in a 100% polyester cloth backing. White or colored light is reflected through a wide viewing range enhancing night time visibility of the wearer.
